

Client Welcome Pack (Website Build)

Send this to a client right after they say yes. It collects everything you need to start, sets the domain choice, and bundles payment + terms. One document, sent once, removes the back-and-forth. Replace [brackets] per client.

Welcome to CS Digital Marketing

Hi [Name], great to have you on board. Here's everything we need to get your website built. Once you've sent the bits below and the deposit's in, I'll have a first version back to you within about two weeks.

What happens next

1. You send the details below + the deposit.
2. I build your site (about 2 weeks).
3. You review, we do up to two rounds of tweaks.
4. We go live. Balance due on launch.

1. Your business details

- Business name (exactly as you want it shown):
- Best contact phone + email (for the website):
- Business hours:
- Short description of what you do (a sentence or two, or I'll write it):

2. Your services

List the services you want pages or sections for (e.g. blocked drains, hot water, gas fitting):

3. Areas you cover

List the suburbs/towns you service (these become your area pages):

4. Branding and photos

- Logo: attach it, or tell me you'd like a simple text logo made.
- Brand colours (if you have any):
- Photos: send any photos of your work, team, vehicles, or premises. The more the better. No photos? Let me know and we'll sort placeholders to start.

5. Domain name (pick 5, in order of preference)

I'll register the best available one as part of your package. Examples: yourbusiness.com.au, yourbusinessmandurah.com.au, etc. 1. 2. 3. 4. 5.

6. Anything else

Existing website or socials, examples of sites you like, anything specific you want:

Payment

Deposit of \$375 (50%) to start. Direct deposit: Account name: [your name] | BSB: [bsb] | Account: [acct] | Reference: [client name] Balance of \$375 on launch. Then \$300/year from 12 months after launch for hosting and upkeep (cancel anytime before renewal).

Terms

The build terms are attached (or below). Reply "agreed" to confirm and we're underway.

Cheers, Coen CS Digital Marketing

Internal note

Log the returned info in the dashboard against the client (Onboarding panel): domain choices, what assets you've received, deposit paid, terms accepted. That panel is your single source of truth for where each build is up to.
